Premium quality aquaculture nutrition

NANNO STAR

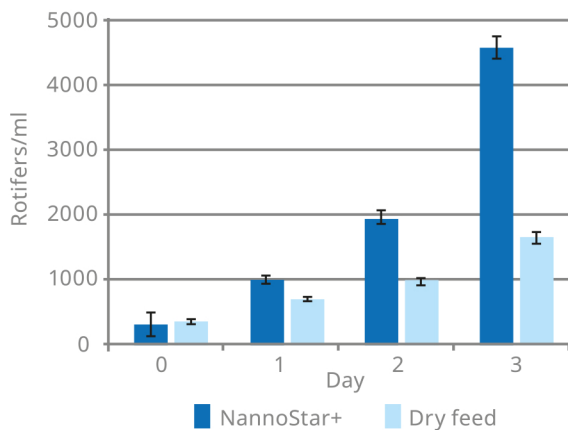

Rotifer feed & enrichment diet DHA/EPA

NannoStar+ is our fresh frozen liquid All-In-One rotifer diet for marine hatcheries. NannoStar+ has a DHA/EPA ratio of 3:1.

NannoStar+ gives a high rotifer yield and it has a superior balanced nutritional value to perform as a "single step diet".

No enrichment is needed. It saves money and time. It reduces risk compared to the use of comparable (dry) diets. It can be used in both batch and continuous rotifer culture systems.

- Premium grade Nannochloropsis blend
- Highest marine biosecurity. Produced in non-marine environment
- Lowest content heavy metals

Instructions for use

Rotifers

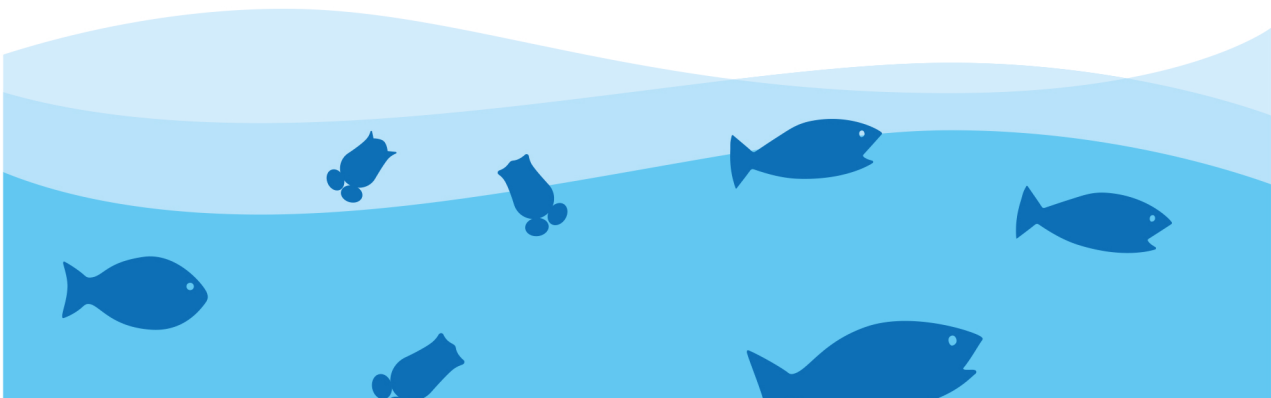

Per million rotifers a feeding rate of 3 to 3.5 ml of NannoStar+ per 24 hours is recommended. Use peristaltic pump for continuous feeding or apply 4 to 6 times per day intermittently.

Growth is optimal at 27 - 28 °C and preferably not lower than 25 °C NannoStar+ easily disperses in water so only very light blending is needed.

Directly after rotifer harvest, the rotifers can be fed to the fish larvae. No enrichment is needed.

Typical analysis (based on dry weight biomass)

Lipids	20%
Proteins	45%
Carbohydrate	26%
Fibers	18%
Ash	7%
DHA	5.2%
EPA	1.7%
Vitamin C	376 mg/kg
Vitamin E	85 mg/kg
Vitamin B12	44 ug/kg

Technical data

Description

Concentrated marine microalgae
Nannochloropsis gaditana blend

Ingredients

Nannochloropsis gaditana, freeze tolerant yeast, other microalgae, minerals, vitamins

Appearance

Viscous dark green liquid

Cell size

2 - 10 microns

Cell count

Avg 30 billion cells/ml

Dry weight algae content

15%

Packaging

Stackable UN food grade cans of 2.4 kilogram.
The product is shipped frozen and must be stored in freezer at -18 °C directly after receipt.

Storage & shelf life

Shelf life is 18 months when frozen (-18 °C)
Once defrosted and opened the product should be used within 4 days and stored at max 4 °C.
Slowly defrost in fridge in 24 to 48 hours.

About us

AlgaSpring is the worlds largest producer of the marine microalgae Nannochloropsis

Our products

AlgaSpring's NannoStar product line offers the purest marine micro algae grown in water that is extracted from an ancient subterranean saline water well.

Our products have a high nutritional value and assure a stable, clean, healthy and fast reproducing zooplankton culture.

Feed safety

Feed quality is important for the continuity of your production and the quality of your fish. AlgaSpring ensures a certified GMP quality of our products throughout the supply chain.

AlgaSpring is also ISO22000 certified for food safety for human nutrition.
